WIREFEEDER (W67)

P/N: WFL019

4 Roll Drive Wire Feeder. For Consistent Wire Feed Control.

Suitable for the Weldmatic 350 and 500, the W67 wire feeder provides the ultimate wire feeding capabilities. The 4 roll drive motor produces a consistent and strong drive for a variety of wires, while the digital meters provide finer set up and control.

With added features including Arc start, purge, latch, burn back and more, the W67 gives users the versatility to custom their settings to suit their wire feeding needs and preferences. Built with heavy duty quality components, and manufactured with 3 years warranty, the W67 offers reliability and performance that's second to none.

SPECIFICATIONS

Primary Voltage	Rated Primary Current	Spool Sizes	Wire Speed Range
24 V DC (from welding power source)	5 Amps	5kg & 15kg	17-189 RPM: 2-22 m/min
Wire Size Range	Pre/Post Gas	Spot Time	Arc Start
0.9mm - 1.6 mm	Yes, 0-10 seconds	Yes, 0-10 seconds	Soft/Fast
Latch	Weight	Warranty	
2T/4T Modes	15.2kg	3 Years	

FEATURES

- Suits 5 and 15kg spools
- Heavy Duty 4 Roll Drive - Large strong drive gears and ball bearings
- Arc Start Control - Fine tunes starting response to suit weld conditions
- Purge - Purges gas line without feeding wire
- Inch - Feeds wire without wasting gas
- Latch - Stop / Start gun switch trigger. Reduces operator fatigue
- Pre Gas - Allows gas to flow before weld starts
- Post Gas - Continued gas flow after weld has finished
- Spot time - For short weld times for repetitive spot welds
- Burn back - Controls wire burn back upon weld completion
